## BASE*dna*® For Directors

Engineered by Leadership, Powered by SCIENCE

The Business Attributes, Skills and Experiences (BASE*dna*®) Analysis is a unique and comprehensive resource designed to facilitate the assessment of *current,* and *target*, Director qualifications. We help Boards evaluate their current inventory of credentials while identifying any additional Board needs. Also, we help the Board develop well-defined specification profiles for assessing new Board member prospects.

This process is supported by our thorough, yet easy to use, Business Attributes, Skills and Experiences (BASE*dna*®) Analysis. Launched by the Board Chair, or the Corporate Governance Chair, this detailed analysis facilitates the process of identifying and selecting Director candidates.

Effective Solutions for Board Succession Planning
